Short-Term Memory

- I. Close your eyes and listen while the instructor reads out a sequence of random words.
- 2. Write down as many as you can remember.
- 3. Listen to the list again: how many were you able to remember?

 Did you do better remembering the ones at the start, middle, or end of the list?

7±2 in Action

```
for (value in vector) {
    print(value)
}
```
